Dear Ember Payments hiring team,

I am applying for the Backend Engineer (Go) role. At Northwind Payments I rebuilt the settlement pipeline as an event-driven service in Go and moved our cron jobs to a queue-backed scheduler with idempotent retries. Your posting asks for Java, GCP, PostgreSQL; that is the work I have been doing for the last three years.

I would like to talk about how Ember Payments keeps its services quiet on call.

Regards,  
Alex Rivera
